#### 第一个题目

# (二) clienthint.js

与 demo 的 clienthint.js 基本一致,要更改的:

Var url= "usercheck.php";

生成 AJAX 对象照抄

# (三) usercheck.php

```
松助 が格式劇 B I U - abe X, X<sup>2</sup> A - ヴ・Δ・A ③ 富富富智 等 - 急・田・ 『正文
                    3 1 2 1 1 1 2 1 2 1 2 1 4 1 5 1 6 1 7 1 8 1 9 1 10 1 11 112 113 1 14 1 15 1 16 1 17 1 18 1 19 1 20 1 21 1 22 1 23 1 24 1 25 1 26 1 27 1 26 1 29 1 20 1 31 1 32 1 33 1 34 1 25 1 26 1 37
      的块板
                                     答案:
                                    <?php -
                                   $con = mysql_connect("localhost","root","sql"); -
                                   mysql_select_db("qing_zhou", $con); mysql_query("set names gb2312.");
                                   $q=$_GET["q"]; ...
                                  $$QL="select count(*) from t_user where userid='$q'"; .
                                  $RS0 = mysql query($SQL);
                                  $RS = mysql fetch array($RS0);
                                 if ($RS[0]>=1).
                                    - echo-"用户 ID 重复, 请重新输入!"; -
                                mysql_close($con); $RS=NULL; $Con = NULL;
                                (四) userinsert.php
                              答案:
    共3页 497个字 [19 中文(中国)
Times New R* 10 - A* A* Aa- A T Aa- A 
                                                                                                                                                                                                                           标题2
                                                                                                                                                                                                  标题1
# B I U - abe X, X' A - ** - A ④ ■ ■ ■ ■ は・ ② - 田 -
  3 | 2 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 19 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30
                    (四) userinsert.php。
                 答案:
                 <?php -
                Scon = mysql_connect("localhost", "root", "sql");
                mysql_select_db("qing_zhou", Scon); mysql_query("set names gb2312.");
               Suserid=$_POST["userid"]; Supassword=$_POST["upassword"]; .
              Suserage=$_POST["userage"]; Susermobile=$_POST["usermobile"];
              SSQL="insert into t_user(userid,password,age,mobile)";
             $SQL=$SQL:"values('Suserid','Supassword',Suserage,'Susermobile')";
            //echo-$SQL; //die(); //
            $RS0 = mysql query($SQL);
           mysql_close(Scon); $RS=NULL; $Con=NULL;
          ?> .
```

### 第二个题目

三、假定 DocumentRoot."C:/xampp/www", www 目录下有 upload 子目录。设 MYSQL 建有 qing zhou 数据库, 有表 t user, 字段分别为用户 ID(字段名 userid, 类型 int), 用户名(字段名 username, 类型 varchar), 密码(字段名 password, 类型 varchar), 年龄(字段名 age, 类型 tinyint), 手机号(字段名 mobile, 类型 char), 用户头像(字 段名 photo, 类型 varchar)。Userid 是自动增长型字段,设为主键。要求如下:

- (1) 写出新增用户界面 (userreg.html), 如左图所示;
- (2) 写出检验用户名和手机号冗余 PHP (usercheck.php);
- (3) 写出新增用户 PHP (userinsert.php);
- (4) 写出 javascript 脚本 (Clienthint.js), 创建一个 AJAX 对象, 检验用户名和手 机号的冗余, 若冗余, 点击保存按钮后, 给出相对应冗余信息的重复提示, 界面如左 图所示; 否则,则在 t user 表新增并显示输入的数据 (userinsert.php);
- (5) 上传的头像图片保存在 upload 子目录中, 其相对路径保存在 photo 字段中, 目 头像的文件名修改为用户名,后缀保持不变,例如右图文件名为 testname11.png;
- (6) userreg.html 中采用 javascript 实现 11 位手机号格式校验:
- (7) 用户新增界面和新增后的用户显示界面均用格式显示:
- (8) 录入数据后显示该用户信息,如右图所示,显示的头像大小固定为"width:100: height:100;", 此图示例的"testname11"用户名和手机号未重复。。

# (本题共60分, 共四个程序, 每个程序各15分)。

用户名: testname

密码:

年龄: 11

手机号: 15523456789

头像:

选择文件 头像.png

保存

用户名重复,请重新输入! 手机号码重复, 请重新输入! 用户名:testname11

I

密码:111

年龄:23

手机号:18612345678

## (-) userreg.html

```
</script>.
  <form id=form1
              name=form1
                       enctype="multipart/form-data".
                                          method=POST
  action="userinsert.php">.
  .
 用户名:<input·type=text·id=username·name=username>
 手机号:<input type=text id=usermobile name=usermobile>
  头 · · 像
                  :<input type=file
                                     id=photo
                                            name=photo-
accept="image/png,image/jpeg">
<td·colspan=4·align=left><input·type=button·value="保存"·onclick="return·efg()">·
*/td>...
<td:colspan=4-align=left><span-id="txtHint"-name="txtHint">-
</form>
```

## (二) clienthint.js

### 基本上与老师给的 demo 一致,要改变的:

```
function stateChanged()
{

var str;

if (xmlHttp.readyState==4 || xmlHttp.readyState=="complete")

str = xmlHttp.responseText;

if (str!="")

{

decument.getElementById("txtHint").innerHTML="str;

}
else

{

document.getElementById("form1").submit();

}

}
```

```
(三) usercheck.php
答案:
</php
$con=mysql connect("localhost","root","sql");
mysql select db("qing zhou", $con); mysql query("set names gb2312.");
$q=$_GET["q"];
$r=$_GET["r"];

$SQL="select count(*) from t user where username='$q'";
$RS0=mysql query($SQL);
$RS=mysql fetch array($RS0);
if ($RS[0]>=1)

{

$smsg="用户名重复,请重新输入!<br/>

$square to the select count(*) from t user where mobile='$r'";
$$SQL="select count(*) from t user where mobile='$r'";
$$RS0=mysql query($SQL);
```

```
$RS0 = mysql query($SQL);
    $RS = mysql fetch array($RS0);
    if ($R$[0]>=1).
    {.
     - $msg:=·"用户名重复,请重新输入!<br>>";。
   }.
   $$QL:="select:count(*):from:t_user:where:mobile='$r'";.
   $RS0=mysql query($SQL);
   $RS - mysql fetch array($RS0);
   if ($RS[0]>=1).
      $msg:=:$msg."手机号码重复,请重新输入!";
  echo $msg;
  mysql_close($con); $RS=NULL; $Con = NULL;
  ?>
   (四) userinsert.php.
  答案:
  <?php ...
  $con = mysql connect("localhost", "root", "sql");
 mysql_select_db("qing_zhou", $con); mysql_query("set names gb2312.");
 $username=$_POST["username"]; $upassword=$_POST["upassword"];
 $userage=$_POST["userage"]; *$usermobile=$_POST["usermobile"];
 $files="photo";
                                                        I
if (is uploaded file($ FILES[$files]['tmp name']))
{.
· · - $phototype=end(explode('.',$ FILES[$files]['name']));
··- $filename: -: $username.".". $phototype;
 - $\slocalfile = \"upload\\\\". \Sfilename;
· · · move uploaded file($ FILES[$files]['tmp_name'], $localfile);
```

```
3 | 2 | 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 122 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 1 30 |
     · · - Sfilename = Susername.".".Sphototype;
      $localfile = "upload\\\\". $filename;
     --- move uploaded file($ FILES[$files]['tmp name'], $localfile);
    }.
    $$QL="insert-into-t_user(username,password,age,mobile,photo)";
                                             SSOL.
   values('Susername','Supassword',Suserage,'Susermobile','Slocalfile')"; I
   $RS0=mysql query($SOL);
  $$QL'=-"select-*-from-t_user-where-username="".$username."";
  $RS1 = mysql query($SQL);
  echo·"";
  while($RS:=:mysql fetch array($RS1))
 {.
 echo·"用户名:".$R$["username"]."\n":。
 echo·"密码:".$RS["password"]."\n":。
 achall to the A 在 $ . 11 CDCIII acall 11 /td /ten /mll.
